

## Delivering Affordable Quality & Innovation.

### Phenolic Focus

Dartford Composites Manufacture a wide range of products for the rail and transport sector, supplying the industry for 30 years.

We are specialists in manufacturing phenolic GRP products. We can manufacture from original drawings and samples or if required reverse engineer to create a new mould to manufacture to your specific requirements.

From prototyping to full production runs we work with you to surpass expectations with 100% commitment to deliver on time and in budget.

Our products offer full traceability for all materials and components used. We mould utilising most recognized methods and will advise on the most suitable and cost-effective method to achieve your requirements.

We can manufacture any GRP product you may require, some examples of recent phenolic products we have made include:

Call for Aid Boxes

Passenger Information Pods

Baby Change Leaf

If you would like further details on our phenolic range or any of our products please contact:
